

## **Reduce the Taxes on Petroleum Products**

**CPI (ML)** Condemns the steep increase of diesel prices which is around Rs. 75 in many cities of India. It also condemns the increase of cooking gas price to almost Rs. 500 a cylinder to domestic use and Rs. 800 to non-subsidy consumers. These price increases are a big onslaught on the people. The union government should reduce its taxes by Rs. 10 per litre petrol and diesel, so that the prices will come down. The prices of oil are artificially increased with abnormal taxes by NDA government which are nowhere in the world. This shows insensitivity of government towards *aam aadmi* who is already suffering with high prices and rupee fall in International market.
