

No One Justify the War ! The War of Hegemonist Powers !!

The anti-imperialist, anti-fascist forces must understand that this is America's ploy. Competition between the powers of Imperialist monopoly capital; It should be understood as political, economic and military competition. The US and its NATO allies are using the Zelensky government as a pawn to fight Russia, their contender in Europe as well as the world. Putin, the President of Russia is also trying to move fast to arrive at a quick solution, even it be an armed one. The victims of the war were civilians. So, no one should justify war, in a war which is being forced upon the people of Donbas and Luhansk, upon the people of Ukraine is being waged by imperialists to establish their hegemonic ambitions. While opposing war thrust upon the people of Europe and Russia the oppressed people of the world must continue their struggle against imperialist exploitation, aggression and bullying. They have a duty to change the system of exploitation of their own countries. At the same time, the Central Committee declares its condolences and sympathy to the victims of the war, and we oppose NATO alliance actions that are responsible for this war episode. We haven't considered Russia and Ukraine countries are that have to go to war as belligerent nations.

Viswam,

General Secretary, Central Committee, CPI (ML)
